

UH-01

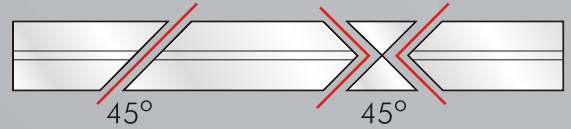

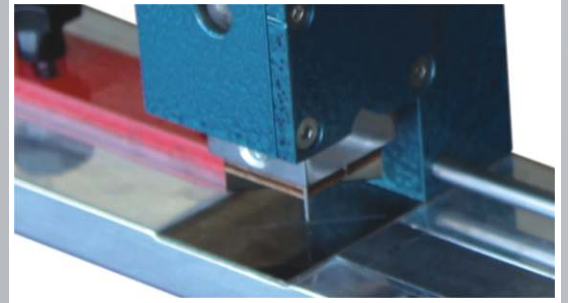

UNIQUE CREASING MATRIX CUTTING MACHINE

EASILY REPLACEABLE CUTTING EDGES

Cutting edges can easily be replaced/changed. By this way, time loss in the production is prevented.

FAST and PRECISE

This machine has been designed with the purpose of cutting the ready channels, used in the manufacturing of package cutting moulds, correctly and in a fast way. By means of UH-01 creasing matrix cutting machines, the time of preparing mould will decrease whereas the quality of your packages will increase.

RIGID and DURABLE

The excessively hard and durable special knives of the machine allow you to perform hundreds of cuttings. There will not be faults at the joining points when straight and angled cutting is performed. Thanks to the practical measurement ruler, it allows you to perform fast cutting, and you gain time.

NO MORE CORROSION and RUSTING

All parts of the machine have been covered with CrN (chrome nitride) which is a special casing type that is resistant against corrosion and rusting for long years.

The machine is guaranteed by our firm for a period of 1 year.
